

# Collaborative Causes Site with Git + GitHub

- Form a group with 2-3 other students.
- Choose a cause that your group really cares about and put together a small informational website using HTML/CSS trying to convince people to donate to or help out this cause.
- Before you even begin coding, sketch out what you'd like the website to look like and discuss who will handle each aspect of the site
- Using Git + GitHub is optional, but you are more than welcome to use it to collaborate with your group members with your instructor's help

## Site Requirements

- At least a basic sketch before you start coding
- At least 3 pages
- An easy way to e-mail the cause with any inquiries
- A few images
- Uses a few different CSS layouts
